

ALTERNATIVE ARMY CONSTRUCTION

• OVERVIEW

The following ruleset can be used as an alternative to the standard Army Construction rules. While the standard Army Construction rules allow for full customization and utilization of Points, this ruleset creates a more strict and structured army-list creation process.

• ADDITIONAL RULES AND RESTRICTIONS

All normal steps and limitations for constructing your army (Select Faction, Select Commander, Construct Tactics Deck etc) apply with the following additional rules:

- Before creating your army, you and your opponent will select a Game Size: **Small, Medium, or Large**. The Game Size determines the amount of total points that will be utilized (*see below*).
- When creating your army, total points are divided between four categories: Combat Unit Points, Attachment Points, Non-Combat Unit Points, and Flex Points. Each category has a minimum allotment of points that may be spent for that specific type (*Example: Medium Game, Combat Unit Points: 26 minimal*).
- In addition to the points allowed in each category, each Game Size will also list an amount of Flex Points. Flex Points can be added to any category and allow it to exceed the listed limit *Example: A Small Game lists a minimal amount of points spent on Attachments as 2, and also allows 4 Flex Points. This army could include a total of up to 6 points in Attachments.*
